Waste minimization resources

Registration Details

Free Class Registration

There is no charge to attend this training. Advance Registration is required. Space is limited / Register early.

Who Should Attend?

Individuals employed in any business that generates less than 5 tons of hazardous waste per year (waste oil is not included in this total). Learn how to save money and resources.

This program was developed to assist businesses in establishing an organized system of record keeping to meet specific requirements of the applicable regulations. This allows for quick evaluation by an inspector, and makes inspections more routine and easy for you to address as part of your normal business activities. It is not intended to include all environmental regulations, and does not necessarily address all items which will be reviewed at the time of inspection.

To obtain more information, call
HMCD at
(408) 918-3400

Compliance with Health and Safety Code and Title 22, California Code of Regulations Hazardous Waste requirements is mandatory for all Hazardous Waste generators.
