

PROJECT UPDATE NOTICE (JANUARY 20, 2009)

The project's community meetings held in 2008 raised many project-related concerns, comments and suggestions by interested parties.

In order to be responsive to the community's needs and concerns, and to address the multi-modal traffic demand on and crossing the expressway, the **preliminary conceptual alternatives** presented at the 2nd community meeting on June 9, 2008 are being modified into **proposed conceptual alternatives**. Additionally, the traffic analysis report originally targeted for release in October 2008 is also being revised to reflect the modified and new proposed conceptual alternatives.

The new and modified **proposed conceptual alternative plans** and traffic analysis report will be posted on the project website as soon as they are ready, and will be presented at an upcoming **3rd community meeting**. The date and time for the 3rd community meeting will be announced as soon as possible.

As always, we appreciate your input and would like to take this opportunity to thank you for your interest and participation in this process. We will keep you posted with our progress and are confident that, together, we can develop a project scope of work that will best suit the community and the traveling public needs.
