EXECUTIVE SUMMARY

The Child Welfare Outcomes and Accountability Report provides a quarterly update on progress toward continuous child welfare improvements for the Santa Clara County Department of Family and Children's Services (SCC DFCS). The report presents federal indicators from round two of the Child and Family Services Review (CFSR) as well as select State indicators. Tracking the County's performance on these indicators is important as the State faces potential financial sanctions for failure to demonstrate improvement.¹

The standards for the federal indicators were set according to states' performance in 2004 at the 75 percentile, challenging states to meet or exceed these national standards. In addition to the federal indicators, the California Department of Social Services, UC Berkeley, and State counties continue to revise the methodology for State-specific indicators (e.g., timely social worker visits) and continue to add more robust indicators that measure the same concept as the federal indicators (e.g., placement stability using an entry cohort followed through an entire time frame). As noted in the previous report, four new child well-being health indicators are introduced: *percent of children with timely medical exams* and *percent of children with timely dental exams*, *percent of children authorized to receive psychotropic medications* and *individualized education plans*. Only the former two indicators have State goals. Finally, data presented may have a time lag of approximately 6 months.² Therefore, programmatic improvements described in the report will not be readily observed, particularly for indicators requiring a longer window of review (e.g., entry cohort indicators).

Basic referral and entry data from Calendar Year 2008 are also included in the report. As noted in the previous report, the most evident change indicates a decline in substantiated referrals and entries into foster care (see p. 7). Substantiated referrals show a marked decline between 2007 and 2008, from 7.6 to 4.8 substantiated referrals per 1,000 children. Additionally, across the past three years, the rate of entry per 1,000 children in SCC has come down from 3.0 children per 1,000 in 2006 to 2.2 children per 1,000 in 2008. Internal data trends on referrals and active cases show a similar downward trend continuing in 2009 and 2010.

The data show a trend of improvement for both Federal and State indicators. Eighteen out of 22 indicators with goals either meet the goal or show improvement compared to the last quarterly report. Of the Federal indicators, the Reunification Composite and two indicators are being met (i.e., *no maltreatment in foster care and reunification within 12 months*, *entry cohort*) and 11 other indicators show improvement toward the national goal (see p. 4). Two of the 5 State indicators are met (i.e. *timely response to immediate referrals*, and *timely social worker visits*), two reflect improvement (i.e. *timely response to 10-day referrals* and *timely dental exams*) and one stayed constant (i.e. *timely medical exams*) as compared to last report. SCC's System Improvement Plan (SIP) uses several State and Federal indicators to track progress on its five overarching goals. These goals and corresponding target indicators are described in the Introduction section of the report (see pp. 1-2). Notable improvements and challenges are highlighted below.

¹ See ACL 00-25, which references: Department of Health and Human Services, Administration for Children and Families (2000). 45 CFR Parts 1355, 1356 and 1357. *Federal Register*, 65(16), 4020-4093.

² See "Structure and Methodology" in the Introduction section of the report.

IMPROVEMENT FINDINGS

Child Safety: “Children are first and foremost protected from abuse and neglect.”

More children experience safety after an initial substantiated allegation. Although the national goal has not yet been reached, improvement continues to be observed in the percent of children who are safe from recurring maltreatment within six months of an initial substantiated allegation. Moreover, SCC is only 1.5 percent shy of meeting the national goal of 94.6 percent or greater.

More children experience safety while in foster care. SCC is meeting State standard for this indicator, which is 99.68% of children in out of home care.

Social workers continue to respond in a timely manner to immediate response referrals. Performance for this indicator has historically been strong and continues to exceed the 95 percent goal at 98.1 percent (see p. 10).

Social workers are increasing timeliness in responding to 10-day referrals. This indicator was identified as a challenge in the last quarterly report, but has shown marked improvement. While only 88% of 10-day referral responses were shown as timely in the last report, the current report reflects a timely response rate of 94.5%, only one-half of a percentage point from the State standard of 95% (see p. 10)

Children receive timely visits from their social workers. The timeliness of these visits continues to exceed the State goal of 90 percent for the fifth consecutive quarter, at 96.6 percent (see p. 11).

Permanency and Stability: “Children have permanency and stability in their living situations without increasing entry into foster care.”

Timeliness and Permanency of Reunification

Children experience timely reunifications. When following children from entry, 53.3 percent are reunified within 12 months, exceeding the national goal of 48.4 percent (see C1.3, p. 13). Moreover, three of the four indicators of the Timeliness and Permanency of Reunification Composite show improvement over a year ago; and, most importantly, for the first time SCC is exceeding the Composite’s national standard.

Placement Stability

More children experience stable foster care placements. The placement stability (i.e., no more than 2 placements) of children in care between 8 days and 12 months continues to incrementally improve across the past seven quarter periods, from 69.2 percent to 84.2 percent (see C4.1, p. 20). While still not meeting the national goal of 86.0 percent, the improvement observed represents a 12.1 percent difference. Placement stability requires the availability and retention of suitable placement alternatives to meet children’s individual needs. Several historical efforts contributed to the recent improvement in placement stability. For example, since 1998 the Board of Supervisors has supported several out-of-home placement initiatives that encourage the recruitment and retention of foster families; and since 2002, DFCS has enhanced placement support resources, improved policies and procedures, encouraged the development of community-based placement support resources, and worked with placement resources and community partners to better coordinate and collaborate efforts to maintain and support appropriate placement alternatives. Examples of key strategies include the use of Team Decision Making Meetings since 2004 to stabilize placements, more consistent reinforcement of the requirement that caregivers give DFCS seven days notice prior to terminating a placement, allowing for the opportunity to stabilize placements or to better plan for a child’s next placement; and specialized training and special foster care rates for foster parents and relatives caring for children with behavior,

medical or other special needs. These efforts culminated in the County being able to close the Children's Shelter and open the Receiving, Assessment and Intake Center (RAIC) on October 1, 2009.

Child and Family Well-being:

“The family relationships and connections of children will be preserved, as appropriate.”

Fewer children experience first placements at the shelter, which on October 2009 was converted to a Children's Receiving Center. There has been a steady decrease in the percent of children who experienced a stay at the shelter upon entry into foster care, from a high of 59 percent to 17.8 percent in the most recent reporting period (see p. 22). Further, more children are being placed with relatives as an initial placement, up 5% from October 2008 to October 2009. This trend is attributed to program efforts to increase the use of family or other more appropriate placements. Note that the Receiving, Assessment and Intake Center did not become the official model until October 2009; therefore, the effects of this change are not yet reflected in the data.

CHALLENGES

Challenges reflected in this quarterly report include timeliness to adoption, use of group home placement, and timely dental examinations for children in foster care.

There is a marked downward trend for timeliness to adoption (see C2, p. 15). However, performance on the one of the most robust indicators, *timeliness of adoptions for children in care for 17 months or longer* shows improvement over the last quarterly report (see C2.3 and C2.5, pp. 16-17). The overall composite score also shows a slight increase in performance (see C2, p. 15). To identify factors impacting timely adoptions, the Department has engaged in a comprehensive drill-down of its entire concurrency planning process (i.e., the process by which an adoptive family is identified should reunification fail). This effort created policies and procedures that emphasize concurrency and permanency activities at the front-end of a child's entry into the foster care system and tracking of identification of permanent homes for children. All Department staff were trained on these new procedures in April 2010.

The data in this report reflect an increase in the use of group home placements as a first placement, as well as in the point-in-time placement analysis. To help address these children's behavioral needs in less restrictive placements, the Department is partnering with County Mental Health, as well as dedicating resources to recruitment of therapeutic foster homes and homes that will take adolescents.

Overall, there is a downward trend in the data for the number of children receiving dental exams in a timely manner, although this data does reflect a slight increase over the last reporting period. The Department has created tracking reports that can be used to identify needed and upcoming exams and has also done a spot-check analyses of the types of placements and children most likely to have a late exam. Using this information, the Department is working with its placement partners in identifying and addressing barriers to children receiving timely dental exams.

Child Health Well-Being	24

INTRODUCTION

The Child Welfare Outcomes and Accountability Report provides a quarterly update on SCC's progress toward continuous child welfare improvements.^{3 4} The Outcomes and Accountability Report is also a tool to help guide management actions. Through dialogue with DFCS and other Agency stakeholders, the report may help elicit analytic questions to better understand and continue to improve outcomes and performance, as appropriate.

SCC CHILD WELFARE IMPROVEMENT EFFORTS

The 2009 SIP highlights several goals and strategies to improve child and family outcomes that reflect both internal and State priorities. Concrete and measurable actions will be used to allow supervisors, managers, and administrators to track implementation success and how these relate to children's safety, permanency and stability, and well-being. Five key SIP goals follow (*target indicators follow each priority area*):

1. Improve the safety of children. A three-pronged approach will be used to improve the safety of children coming into contact with child welfare. The first approach has managers reviewing all emotional abuse referrals. About a quarter of all referrals are for emotional abuse, a rate that increased after the disuse of the substantial risk allegation (which the Department now only uses to classify voluntary cases). Secondly, social workers will assess all families using the Comprehensive Assessment Tool (CAT) at each decision point in the life of a case and will use consistent documentation protocols for investigative narratives. In this manner, all families will be looked at through the same comprehensive lens in order to fully capture their individual needs. Thirdly, the Emergency Response and Dependency Intake functions will be redesigned to support the abovementioned approaches.

- S1 No recurrence of maltreatment (see p. 9)

2. Reduce the disproportionate representation of children of color in the foster care system, with a focus on children re-entering care. Reducing disproportionality, particularly of African American children, remains a top priority and major concern for the Agency. In general, across indicators of referral and entry, child safety, permanency and stability, and well-being, African American children are more likely to experience lower outcomes compared to children of other ethnic or racial backgrounds. Two intervention strategies will be implemented to reduce ethnic disproportionality. First, front end strategies will be expanded by contracting with service providers who will offer culturally-specific services in the facilitation of family team meetings and on-demand consultation for specific ethnic populations. The Department will prioritize services for African American families. Second, the Agency will continue to tailor and expand training for managers, supervisors, and staff that promotes cultural sensitivity relating to child protection and well-being. By providing culturally-focused services both internally (e.g., through social workers) and externally (e.g., through contractors), families may be more likely to engage in services thereby improving family reunification outcomes, as well as the sustainability of reunification efforts.

³ State Accountability Act, Assembly Bill (AB) 636, California-Children & Family Services Review, 2001.

⁴ Administration for Children and Family Services, Department of Health and Human Services (2006). The data indicators, data composites and National standards to be used in the Child and Family Services Reviews. Federal Register (71)109, 32969-32987.

Other tools and resources used to reduce disproportionality include a report developed by the SPHERE Institute that tracks the proportion of children involved in the child welfare system by ethnicity/race at key child welfare decision points. Managers use this quarterly report to watch for significant variations that may relate to important changes in practice. Finally, the Unified Children of Color Task Force's annual plan has proven effective at addressing and uncovering areas that need further attention. The task force is presently operationalizing and implementing its 2009 plan, which will rely on SPHERE's tracking report to monitor and assess the impact of key program elements.

- First entry into care (see p. 8)
- C1.4 Re-entry following reunification (see p. 14)

3. Increase child and family involvement in case planning. Families and children who are engaged in developing their case plans are more likely to participate and complete services. Engagement in case planning may be a vehicle by which children experience greater stability while in care and are then successfully reunified with their families. To this end, DFCS will enhance training to include creative ways to engage children and their families in case planning and expand outreach efforts to have all key family members participate in case planning. All children over the age of 10 years, incarcerated parents, and less-involved fathers and mothers will be engaged to improve their participation in case planning.

- C1.3 Reunification, entry cohort (see p. 13)
- C4.1 Placement stability, 8 days to 12 months in care (see p. 20)

4. Increase timeliness of adoptions. Concurrent plans help identify the best placement option while children are in foster care. Later, if reunification is not possible, the concurrent home is more likely to turn into the child's permanent home, which would occur preferably through adoption or guardianship. In some instances, the concurrent caregiver may not be able to formally adopt or become the guardian but may nonetheless continue to be the permanent caregiver of the child. To increase the number of children placed in concurrent homes, social workers will develop the alternative placement plan required by concurrent planning for all children receiving family reunification services within 59 days of the child's initial removal from their parents. This will entail identifying potential caregivers who can serve as the permanent caregiver for the child when reunification is not possible.

- C2.3 Adoption within 12 months of being in care for 17 months or longer (see p. 16)
- C2.5 Adoption within 12 months of becoming legally free for adoption (see p. 17)

5. Ensure that all children have timely medical and dental services and, when needed, educational services and supports. The State in partnership with UC Berkeley is launching indicators to track timely completion of medical and dental exams starting in July 2009 and children's need for individualized education plans (IEP) in October 2009. In preparation, the Department engaged in thorough case review to ensure that all children have current medical and dental exams.

- 5B Timely Medical Exams
- 5B Timely Dental Exams
- 6B Individualized Education Plan

STRUCTURE AND METHODOLOGY

To report on child welfare outcomes and performance, the report is divided into two sections:

Section I presents Child Welfare Outcomes at a Glance; these are outcome summaries for federal and State indicators and composites.

Section II presents historical charts and ethnicity tables for federal and select State indicators (some may not have ethnic breakdown tables). Composite historical charts are also included where appropriate.

Three main methods are used to report on child welfare outcomes and performance. First, entry cohort indicators assess *all* children's experiences longitudinally. This method provides a more comprehensive understanding of children's experiences in the child welfare system. Second, exit cohort indicators assess children's experiences as they exit the child welfare system. Third, median time is used to assess the time that it takes to reunification or adoption.

To evaluate performance:

- All federal indicators/composites are compared against national standards or goals.
- Present performance is compared to last year's performance.
- Select charts compare SCC against Statewide performance.⁵

Data used in the present report was provided by the Center for Social Sciences Research, UC Berkeley.⁶

⁵ Caution is advised for indicators or descriptive categories with statistically small numbers (e.g., maltreatment in foster care, Native Americans receiving child welfare services).

⁶ To learn more about California child welfare performance data, visit <http://cssr.berkeley.edu/CWSCMSreports>.

CHILD WELFARE OUTCOMES AT A GLANCE

Performance Relative to Federal Goal

Safety, Permanency, and Child Well-being Indicators with Standards

Indicator	Two-Year Comparison (rolling-year)		National or State Standard
	Last Year	Current Period	
CHILD SAFETY			
S1. No Recurrence of Maltreatment	Oct07- Mar08	Oct08- Mar09	
	90.5%	93.1%	≥ 94.6%
S2. No Maltreatment in Foster Care	Oct07- Sep08	Oct08- Sep09	
	99.52%	99.70%	≥ 99.68%
2B. Timely Response to Immediate Referrals (State indicator)	Jul08- Sep08	Jul09- Sep09	
	97.3%	98.2%	≥ 95.0%
2B. Timely Response to 10-day Referrals (State indicator)	94.2%	94.5%	≥ 95.0%
2C. Timely Social Worker Visits (State indicator)	89.3%	96.6%	≥ 90.0%
PERMANENCY & STABILITY			
COMPOSITE 1: Timeliness and Permanency of Reunification			
C1.1. Reunification within 12 Months (Exit Cohort)	Oct07- Sep08	Oct08- Sep09	
	63.0%	70.3%	≥ 75.2%
C1.2. Median Time to Reunification (Exit Cohort)	8 mos.	6.5 mos.	≤ 5.4 mos.
C1.3. Reunification within 12 Months (Entry Cohort)	Apr07- Sep07	Apr08- Sep08	
	48.2%	53.3%	≥ 48.4%
C1.4. Re-entry Following Reunification (Exit Cohort)	Oct06- Sep07	Oct07- Sep08	
	11.5%	12.6%	≤ 9.9%
COMPOSITE 2: Timeliness to Adoption			
C2.1. Adoption within 24 Months (Exit Cohort)	Oct07- Sep08	Oct08- Sep09	
	27.4%	20.4%	≥ 36.6%
C2.2. Median Time to Adoption (Exit Cohort)	29.8 mos.	34 mos.	≤ 27.3 mos.
C2.3. Adoption within 12 Months (17 Months in Care)	17.4%	19.1%	≥ 22.7%
C2.4. Legally Free within 6 Months (17 Months in Care)	Oct07- Mar08	Oct08- Mar09	
	3.9%	8.6%	≥ 10.9%
C2.5. Adoption within 12 Months (Legally Free)	Oct06- Sep07	Oct07- Sep08	
	43.3%	43.8%	≥ 53.7%
COMPOSITE 3: Permanency for Children in Long-term Care			
C3.1. Exits To Permanency (24 Months in Care)	Oct07- Sep08	Oct08- Sep09	
	21.5%	23.7%	≥ 29.1%
C3.2. Exits To Permanency (Legally Free for Adoption at Exit)	94.0%	92.4%	≥ 98.0%
C3.3. In Care 3 Years Or Longer (at emancipation or Age 18)	55.9%	56.6%	≤ 37.5%

Safety and Permanency/Stability Indicators			
Indicator	Two-Year Comparison (rolling-year)		National or State Standard
	Last Year	Current Period	
COMPOSITE 4: Placement Stability			
C4.1. Children with \leq 2 placements (8 days to 12 months in care)	Oct07- Sep08	Oct08- Sep09	\geq 86.0%
	77.7%	84.2%	
C4.2. Children with \leq 2 placements (12 to 24 months in care)	47.8%	51.7%	\geq 65.4%
C4.3. Children with \leq 2 placements (at least 24 months in care)	20.9%	24.3%	\geq 41.8%
CHILD HEALTH WELL-BEING			
	Jul08- Sep08	Jul09- Sep09	
5B.1. Children receive timely medical exams (State indicator)	97.2%	96.3%	100.0%
5B.2. Children receive timely dental exams (State indicator)	90.2%	82.9%	100.0%

Child and Family Well-being Indicators without Standards

Indicator	Two-Year Comparison (rolling-year)		Improvement (✓) or Decline (✗)
	Last Year	Current Period	
4A. Sibling Placement	Oct08	Oct09	
All siblings	45.9%	53.2%	✓
Some or all siblings	64.6%	68.9%	✓
4B. Least Restrictive Placement FIRST PLACEMENT (8 days or more in foster care)	Oct07- Sep08	Oct08- Sep09	
Relative	9.6%	14.6%	✓
Foster home	27.7%	38.6%	✓
Foster Family Agency	7.3%	10.4%	na
Group home	9.7%	16.7%	✗
Children's Shelter	43.9%	17.8%	✓
Other	1.8%	1.9%	na
4B. Least Restrictive Placement POINT-IN-TIME PLACEMENT	Oct08	Oct09	
Relative	43.6%	41.4%	✗
Foster home	15.8%	17.8%	✓
Foster Family Agency	20.7%	21.3%	na
Group home	10.7%	11.8%	✗
Children's Receiving Center	0.6%	0.1%	✓
Other	8.6%	7.6%	na
	Jul08- Sep08	Jul09- Sep09	
5F. Children Authorized for Psychotropic Medication	11.8%	16.7%	na
6B. Individualized Education Plan	22.5%	21.7%	na

Note: NA is used for specific placement types or psychotropic medication, which have no directional goal.

HISTORICAL DATA CHARTS AND RACE/ETHNICITY TABLES

Participation Rates

Ethnicity	Referrals	Substantiated Referrals	All Entries
Black	122.8	19.5	11.2
White	21.0	3.0	1.4
Hispanic	50.3	8.2	3.8
Asian/ Pacific Islander	13.7	2.1	0.6
Native American	23.2	5.1	4.5
Total	31.3	4.8	2.2

Child Safety

S1. Of all children who were victims of a substantiated or indicated maltreatment allegation during the first 6 months of a year, what percent were not victims of another substantiated or indicated maltreatment allegation within the next 6-month period?

S1	National Standard	Last Year (Oct07- Mar08)		Current Period (Oct08- Mar09)	
		Rate	Goal met (✓) or not (✗)	Rate	Goal met (✓) or not (✗)
Black	≥ 94.6%	83.9%	✗	92.2%	✗
White	≥ 94.6%	91.9%	✗	93.1%	✗
Hispanic	≥ 94.6%	91.0%	✗	92.5%	✗
Asian/ Pacific Islander	≥ 94.6%	91.6%	✗	97.2%	✓
Native American	≥ 94.6%	60.0%	✗	100.0%	✓
Total	≥ 94.6%	90.5%	✗	93.1%	✗

S2. Of all children served in foster care during the year, what percent were not victims of a substantiated maltreatment allegation by a foster parent or facility staff member?

S2	National Standard	Last year (Oct07- Sep08)		Current Period (Oct08- Sep09)	
		Rate	Goal met (✓) or not (✗)	Rate	Goal met (✓) or not (✗)
Black	≥ 99.68%	99.38%	✗	100.00%	✓

Total	≥ 90%	92.2%	✓	96.3%	✓

(Note: Due to a small number of children with missing ethnicity coding, the result of the ethnicity table is slightly different from the trend data in the chart above.)

Timeliness and Permanency of Reunification

C1.1. Of all children discharged from foster care to reunification in the year who had been in foster care for 8 days or longer, what percent were reunified in less than 12 months from the date of the latest removal from home?

C1.1. Reunification within 12 Months (Exit Cohort)					
C1.1	National Standard	Last year (Oct07- Sep08)		Current Period (Oct08- Sep09)	
Ethnicity	Rate	Rate	Goal met (✓) or not (✗)	Rate	Goal met (✓) or not (✗)
Black	≥ 75.2%	61.8%	✗	81.0%	✓
White	≥ 75.2%	57.0%	✗	58.8%	✗
Hispanic	≥ 75.2%	64.8%	✗	70.6%	✗
Asian/ Pacific Islander	≥ 75.2%	62.0%	✗	75.8%	✓
Native American	≥ 75.2%	100.0%	✓	100.0%	✓
Total	≥ 75.2%	63.0%	✗	70.3%	✗

C1.2. Of all children in foster care for 8 days or longer discharged to reunification during the year, what was the median length of stay (in months) from the date of latest removal from home until the date of discharge to reunification?

C1.2	National Standard	Last year (Oct07- Sep08)		Current Period (Oct08- Sep09)	
Ethnicity	Month	Median Months	Goal met (✓) or not (✗)	Median Months	Goal met (✓) or not (✗)
Black	≤ 5.4	7.9	✗	4.5	✓
White	≤ 5.4	7.9	✗	8.9	✗
Hispanic	≤ 5.4	8.4	✗	5.6	✗
Asian/ Pacific Islander	≤ 5.4	8.7	✗	2.8	✓
Native American	≤ 5.4	3.2	✓	4.6	✓
Total	≤ 5.4	8.0	✗	6.5	✗

C1.3. Of all children entering foster care for the first time in a 6-month period, and who remained in foster care for 8 days or longer, what percent were discharged from foster care to reunification in less than 12 months from the date of latest removal from home?

C1.3	National Standard	Last year (Apr07- Sep07)		Current Period (Apr08- Sep08)	
Ethnicity	Rate	Rate	Goal met (✓) or not (✗)	Rate	Goal met (✓) or not (✗)
Black	≥ 48.4%	38.7%	✗	41.7%	✗
White	≥ 48.4%	43.3%	✗	55.3%	✓
Hispanic	≥ 48.4%	49.6%	✓	51.5%	✓
Asian/ Pacific Islander	≥ 48.4%	56.0%	✓	72.4%	✓
Native American	≥ 48.4%	50.0%	✓	33.3%	✗
Total	≥ 48.4%	48.2%	✗	53.3%	✓

Historical Data Charts and Race/Ethnicity Tables

C1.4. Of all children discharged from foster care to reunification during the year, what percent reentered foster care in less than 12 months from the date of discharge?

C1.4. Re-entry Following Reunification					
C1.4	National Standard	Last Year (Oct06- Sep07)		Current Period (Oct07- Sep08)	
Ethnicity	Rate	Rate	Goal met (✓) or not (✗)	Rate	Goal met (✓) or not (✗)
Black	≤ 9.9%	15.3%	✗	28.8%	✗
White	≤ 9.9%	13.1%	✗	10.3%	✗
Hispanic	≤ 9.9%	10.1%	✗	12.3%	✗
