HOW TO GET TO A TESTING SITE

A guide for users of private, public, and paratransit transportation

- **START**
  - Do you have any COVID-19 symptoms (fever, cough, shortness of breath, etc.)?*
    - **Yes**
      - Do you have your own car or access to a private vehicle?
        - **Yes**
          - Drive yourself or have a member of your household drive you to testing (encourage them to get tested, too!)
        - **No**
          - Call your healthcare provider or health plan and ask if they can arrange transportation to a testing site for you
    - **No**
      - Use your typical mode of transport
      - Your own car or another private vehicle
      - Public transportation (VTA Route Planning: 408-321-2300)
      - Paratransit (408-321-2831)

*NOTE: If you develop emergency warning signs for COVID-19, get medical attention immediately. Emergency warning signs include trouble breathing, persistent pain or pressure in the chest, new confusion or inability to arouse, and bluish lips or face.

This list is not all-inclusive. Please contact your medical provider for any other symptoms that are severe or concerning.
