Overall Comments:

Follow up inspection to confirm elimination of cockroach infestation.

Observations:

- Pest control present during routine inspection.
- Pest reports reviewed for 11/27/18, 1/8/19, 1/22/19, and 2/5/19. Missing pest reports from November 27, 2018 to January 8, 2019. Ensure all pest reports are maintained at facility for review upon inspections.
- Found 3 deadcockroaches under equipment and one slow moving cockroach outside of dish machine near buttons. Pest control eliminated slow moving cockroach.
- Operator removed cover for electrical components on dish machine. Observed chemical substances in electrical box for prevention, no live or dead cockroaches found.
- Per PIC, autochlor and pest control will both be monitoring, cleaning, and servicing electrical component during frequent visits to ensure no harborage of cockroaches.
- All cracks and crevices have been sealed in areas near dish station and dry storage room. Walls of dish station and cooking equipment have been thoroughly cleaned. FRP re-painted with white high gloss paint since some of stains would not come out with the deep cleaning.
- No live cockroach activity observed and violations have been corrected, facility okay to re-open. Staff directed to clean and sanitize floors and equipment prior to operation.

When required to determine compliance, a single reinspection will be conducted without additional charge. If subsequent reinspections are required, an hourly fee (minimum one hour) at the current rate approved by the Board of Supervisors will be assessed for each and every reinspection until the necessary changes or corrections are made. Unless otherwise noted by the inspector, all violations are to be corrected no later than **2/20/2019**. Any major change in menu or any change in ownership must have prior approval by this Department. This may require structural and/or equipment changes or remodeling to accommodate new operations.
