

## Project Description

Tou-Bar Equipment Company Inc. is a general engineering construction company specializing in demolition, excavation, site grading and utility trenching work.

Tou-Bar Equipment Company Inc. is a family owned and operated company that was established in March of 1989. Over the past 28 years Tou-Bar Equipment Company's family like working environment and values have allowed it to maintain a positive and long lasting working relationship with its customers and suppliers. This working environment provides for a confident and capable core group of long term dedicated employees.

The majority of the work that Tou-Bar Equipment Company Inc. performs is operated in the high end residential housing and light commercial construction market. Along with this work Tou-Bar Equipment Company Inc. also performs grading and underground utility repair work for local municipalities. An example of the work Tou-Bar Equipment Company Inc. is proud to perform is the final closure and placement of the evapotranspiration (ET) soil cover cap on the Palo Alto Landfill. Included in the closure and cap of the landfill was the development and expansion of Byxbee Park Hills.

The existing and perspective contractors that seek work with Tou-Bar Equipment Company Inc. are development contracting companies that focus on building residential and retail structures that increase value and benefit positive grown inside the surrounding community. Theses developers look to Tou-Bar Equipment Company Inc. for there expertise and experience to complete a project correctly and within the allotted schedule.

Tou-Bar Equipment Company Inc. focuses on assisting in the development of residential and light commercial areas of the construction market. This development is accomplished thru long lasting pre-existing relationships and continuously growing new relations with valued customers. Tou-Bar Equipment Company Inc. is dedicated to the work it performs and plans to continue to meet the needs of it customers, while maintaining its family like values.

Daily traffic on and off of site

Full operational capacity:

5 truck drivers (3 axle peterbuilt trucks)

5 lead men (2 axle pickup)

10 laborers (Laborers ride with lead men)

Arriving on site in a personal vehicle and leaving for work in a company vehicle between the hours of 6:45-7:15am.

Arriving on site in a company vehicle and leaving in a personal vehicle between the hours of 5:00-5:30pm.

2 mechanics will arrive at 8:00am and remain on premises until 5:00pm, these mechanics may travel off site to perform in field repairs as necessary. In field repairs will typically only require the mechanic to leave the site and return once during the course of the day.

((1) 2axle peterbuilt fuel truck, (1) 2axle pickup service truck)

3-5 office staff will arrive at the site at 8:00am and remain on the premises until 5:00pm.

2 project managers will arrive on site at 7:00am and leave the site between the hours of 5:00-5:30pm. These employees will travel between the site and a job as needed throughout the day, typically not to exceed 3 trips per day.

Partial operational capacity:

During the winter season (periods of heavy rain) the office staff, mechanics, and project managers are the only employees who will be traveling to and from the site.

Weekends:

Tou-Bar does not typically operate on Saturday or Sundays, unless when need on an emergency only basis.
