February 18, 1971

Mr. Victor Calvo, Supervisor,
Santa Clara County,
County Offices,
San Jose,
California.

Dear Mr. Calvo,

Following up on our conversation of last night, I would like to obtain, as a minimum, copies of the following items relating to the Permanente Cement Plant facility:-

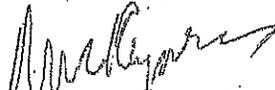

- (1) Title deed and covenants
- (2) Map of record, preferably with contour elevations
- (3) Use and excavation permits
- (4) Any State or County regulations and restrictions relative to the operation of quarries
- (5) Zoning documents
- (6) Minutes of Supervisors Meetings during which any discussions of the above may have taken place

Your offer of assistance in locating these and other documents of interest in this case is very much appreciated.

I shall plan to spend the afternoon of Wednesday, Feb. 24, in the County Offices to collect this information, and will call at your office at 1 p.m. to pick up whatever your staff has been able to obtain by then. If you have an open 15 minutes that afternoon, perhaps we could schedule a short discussion.

My purpose in this exercise is to become adequately informed in order that I may assess the possible courses of action leading to minimizing the deterioration of the Mora ridge and the eventual restoration of the quarry site to a place of beauty for the County of Santa Clara.

Very truly yours,

Wm. C. Reynolds,
Professor.
