**Optimal times to use COVID-19 PLUS Kits are:**

1. For Persons Under Investigation (PUIs)
2. When positive Antigen Results are detected during routine surveillance testing
3. When a positive new case has been identified with PCR testing (within <72 hours)
4. When Response Driven Testing (RDT) begins, coordinate with the consulting PHN and conduct the 1-2 rounds of testing using the PHL.
5. Whenever you have a person with a positive PCR test by a private lab, including positive PCR results from your RDT.
6. Persons returning from travel >150 miles from Santa Clara County

When you drop off the clinical samples for testing at the Public Health Lab, please request to replenish kits so that you always have at least 10 kits at your facility. Call 408-970-2900 to obtain specimen collection kits.

**Abbreviation Definitions:**

- **RDT:** Response Driven Testing
- **TAT:** Turn-Around-Time

**If your facility is not yet testing with Antigen Testing and you are interested, please contact Eddie Hernandez at eddie.hernandez@phd.sccgov.org.**
