# TABLE OF CONTENTS

**ACKNOWLEDGMENTS** .............................................................................................................ii  
**INTRODUCTION** .......................................................................................................................iii  
**ACRONYM GUIDE** ....................................................................................................................iv  
**CHAPTER 1 – GENERAL SURGE CAPACITY PLAN OVERVIEW**  
  Planning Assumptions ........................................................................................................... 1-1  
  Communication Systems ....................................................................................................... 1-2  
  [Insert Jurisdiction Here] Hospital Command Center (HCC) Contact Information  
  Risk Communications .......................................................................................................... 1-3  
  Transportation ..................................................................................................................... 1-4  
  Emergency Declarations – *(See CDPH Reference Manual, Section 3.2, pg. 5 for a sample  
  Emergency Declarations Statutes Analysis Table. See also Foundational Knowledge, Section 9, Tool 4,  
  pg. 101 for a Statutory and Regulatory Flexibility Under Emergency Declarations Table.)*  
  Surge Regulations/Legal Compliance Matrix – *(See CDPH Reference Manual, Section 3, pg. 4  
  for this sample matrix.)*  

**CHAPTER 2 – PATIENT MANAGEMENT**  
  Patient Tracking (Model) ..................................................................................................... 2-1  
  Rapid Discharge (Model) .................................................................................................... 2-2  
  *Emergency Response Rapid Discharge Order  
  Emergency Response Rapid Discharge Prescription Order*  
  Patient Transfer (Forms) .................................................................................................... 2-3  
  *Facility Transfer Summary Form  
  Facility Transfer Short Form Medical Record*  
  Mass Fatality Considerations .............................................................................................. 2-4  
  Standard of Care .................................................................................................................. 2-5  
  Surge Plan Phases 1–5 (Tool) ............................................................................................ 2-6  
  *Description of Surge Beds by Phases 1–5*  

**CHAPTER 3 – ALTERNATE CARE SITES**  
  Alternate Care Sites – Not Hospital-Owned/Operated (Tool) (Forms)............................... 3-1  
  *Alternate Care Site (ACS) Facility Assessment Checklist  
  Alternate Care Sites Master List  
  Alternate Care Site/Expanded Treatment Area Medical Equipment Inventory  
  Alternate Care Site Staffing*  
  Expanded Treatment Areas – Hospital-Owned/Operated (Tool)...................................... 3-2  
  *Expanded Treatment Area (ETA) Owned Space Assessment Checklist  
  Expanded Treatment Areas Properties Operated by Hospital*  

**CHAPTER 4 – PERSONNEL**  
  Staffing During Surge ......................................................................................................... 4-1  
  *Strategy for RNs  
  Essential Staffing Chart*  
  Altered Care Nurse Staffing Ratio Tables (Tool) ............................................................... 4-2  
  Staff Shortage Plan (Model) ............................................................................................. 4-3  
  Staff Support Plan (Model) .............................................................................................. 4-4  

* Please refer to California Department of Public Health (CDPH) Standards and Guidelines for Healthcare Surge  
  During Emergencies at: [http://bepreparedcalifornia.ca.gov/epo](http://bepreparedcalifornia.ca.gov/epo)  

May 2008
**TABLE OF CONTENTS**

Potential Staffing Sources (Tool) ................................................................. 4-5  
Volunteer Credentialing – *(See CDPH Hospital Operational Tools Manual, pg. 5 for a tool covering the Acceptance and Assignment of Augmented Staff During Healthcare Surge. See pg. 12 for a sample Credential Log for Licensed Healthcare Professionals. See pgs. 56-65 for sample Applications for Clinical/Non-Clinical Staff.)*

Dependent Care Plan (Model) ........................................................................ 4-6  
Pet Care Plan (Model) .................................................................................. 4-7

**CHAPTER 5 – SUPPLIES, EQUIPMENT, PHARMACEUTICALS**

Facility Resource Assessment (Tool) .............................................................. 5-1  

Hospital Mutual Aid System Memorandum of Understanding (MOU) (Model) ........ 5-2

  - H-MAS MOU Quick Reference Guide
  - Hospital Status Report Form
  - Resource Request Form
  - Resource Accounting Record – Supplies Received
  - Resource Accounting Record – Supplies Donated

Vendor Considerations Checklist .................................................................. 5-3

**CHAPTER 6 – SECURITY**

Security ........................................................................................................... 6-1

**CHAPTER 7 – ACTIONS BY SCENARIO**

Overview ....................................................................................................... 7-1  
Earthquake (Tool) ......................................................................................... 7-2  
Nuclear Incident (Tool) .................................................................................. 7-3  
Pandemic Influenza (Tool) ............................................................................. 7-4

**CHAPTER 8 – CRITICAL ACTION SHEETS**

Overview ....................................................................................................... 8-1  
Mass Casualty (Tool) ..................................................................................... 8-2  
Hospital Evacuation (Tool) ........................................................................... 8-3

**APPENDIX**

Jurisdiction Reference Material .................................................................. A-1

*[List and insert applicable City, County, or Regional model plans/best practices that may be used as reference materials in the planning process or during a surge event.]*

Florida Department of Health – Best Practice ............................................. A-2

  - Expanding Hospital Surge Capacity Project

Stanford University Medical Center – Best Practices ................................. A-3

  - Establishment of a Smallpox or Infectious Disease Isolation Unit
  - Stanford University Medical Center – Mass Fatality Plan

* Please refer to California Department of Public Health (CDPH) Standards and Guidelines for Healthcare Surge During Emergencies at: [http://bepreparedcalifornia.ca.gov/epo](http://bepreparedcalifornia.ca.gov/epo)
